

Write a program to calculate simple interest for a given  $P=\$6000$ ,  $T=2$ years,  $R=3.5$  p.a.

```
#include<stdio.h>
int main()
{
    int p=6000,t=2;
    float r=3.5;
    printf("Result = %f.",p*t*r/100);
    return 0;
}
```
