Write a program to calculate area of an ellipse having its minor axes=7cm & major axes=10cm.

```c
#include<stdio.h>
int main()
{
    int a=7,b=10;
    float pi=3.1415;
    printf("Result = %f cm square.",pi*a*b);
    return 0;
}
```
